DV Sport Software — Lead iOS Engineer & Designer

Video delivery platform

- Utilized HashSets to perform data synchronization for sets of tens of thousands of items (Team's video libraries)
- Unified all cross-platform applications with a material design UI template
- In-depth experience with CoreGraphics, AVFoundation, and ExternalAccessory
- Built NBA courtside challenge solution used by 7 teams during the 2020 season, generating $210,000 in rev.
- Used advance AVPlayer techniques to allow for smooth scrubbing of video at different playback rates across a stream
- Transitioned codebase to module libraries for code reusability
- Created QA test procedures used in 50+ App Store releases
- ~40,000 downloads

2016-Present — Swift, C#, & Objective C

Slyce — iOS Engineer

Brand/influencer media platform

- Implemented Swift style guide
- Created UI tests using XCTest
- Integrated application KPI's to assist in analytics for business strategy
- Used SQLite to implement a cache and offer offline capabilities
- 3rd party social media integrations for posting content
- Improved network calls by utilizing PromiseKit for content retrieval
- Worked directly with designers to architect and implement the applications UI
- Multiple post's created by Steph Curry, Justin Forsett, Andre Ward and others

2016 — Swift

tag — iOS Intern

Social media

- Acquired by Mark Cuban in 2015
- Created "Doodling" on images using CoreGraphics
- Implemented search features using UISearchDisplayController
- Added gesture recognizers throughout the application
- 3rd party social media integrations
- Assisted in UI/UX design

2015 — Objective C

Skills

5.0 out of 5

Swift		C#/Xamarin	
Objective C		Visual Studio	
Xcode		AWS/Azure	
Git		Adobe suite
